Immigration to Australia

Where is Australia?

Australia is located entirely in the Southern Hemisphere, between the Indian and Pacific Oceans, below Southeast Asia and north of Antarctica. This country is surrounded by water. With an area of 7,617,930 square kilometers, Australia is about 95% the size of the United States (excluding Alaska). Australia is a self-governing country under the supervision of the United Kingdom, consisting of mainland Australia, Tasmania and several smaller islands.

History of Australia

- Australia's independence was officially announced on the first day of January, and from now on, Australia became an independent government but in the British -backed group . Australians celebrate this day as their national day. From 1901 to 1927, when Canberra was founded, the Australian Federation considered Melbourne to be the temporary capital of the country.
