Immigration to Canada

Canada

- **Canada is the second largest country in the world**
- **Canada is one of the least populated countries in the world**
- **It is one of the most immigrant-friendly countries in the world**

History

Canada is a bilingual country, officially speaking English and French, reflecting its history as a land once contested between two major European powers. The word Kannada is derived from the Indian word "Kanata" meaning village or settlement

Canadian weather

Canada's climate is highly variable due to its large size

Spring: The days are getting warmer and longer, but the nights are still cool

Summer: The temperature in some inland areas sometimes exceeds 40 degrees Celsius

Fall: The weather in autumn is usually rainy

Winter: It is usually cold and the temperature during winter is often lower or around zero degrees Celsius.

Canadian economy

Canada has 33.2 million natural resources

75% of Canadian exports to America

Canada's oil reserves are probably more than the Middle East

Second world ranking of quality of life in Canada

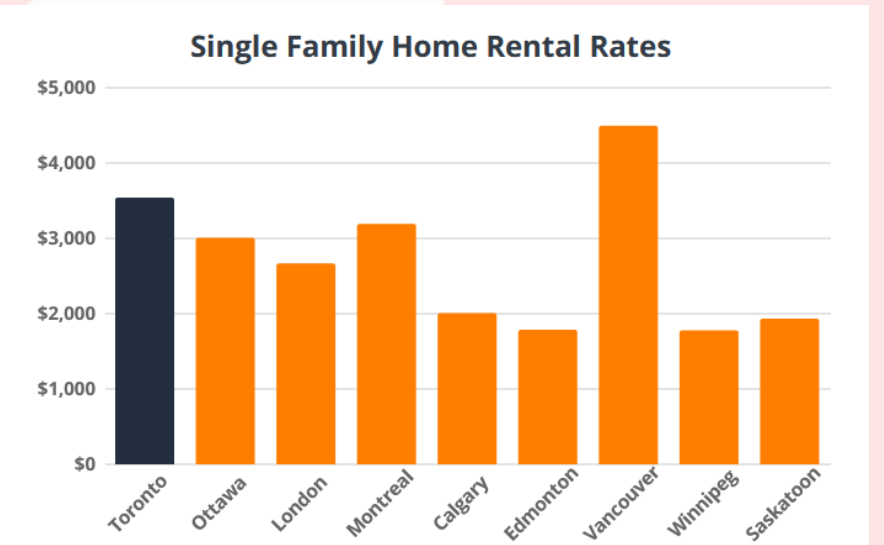

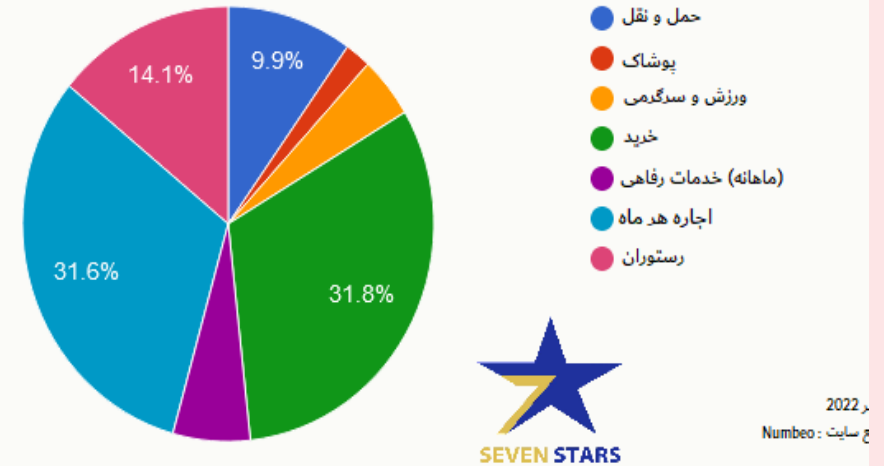

living in Canada

Canada often ranks high on the United Nations' annual Human Development Index, which combines measures of life expectancy, education and per capita income.

Staying in Canada is cheaper compared to western countries

The cost of living in Canada varies from city to city
